

Kiran Ragavender Shankar

COMPUTER SCIENCE @ CSUN · COMPTIA SECURITY+

I'm a Computer Science student at California State University, Northridge (B.S., May 2027) who likes building my own tools in Python on Linux, from a network traffic analyzer to a multithreaded port scanner. I bring 2+ years of hands-on IT and systems experience, including 15 months as the sole IT resource for a small organization, and I'm currently helping plan the architecture and security of a simulation platform with NASA JPL.

Los Angeles, CA · Available for full-time work June 2027

Work Experience

MoonWalkers Project Contributor

CSUN Autonomy Research Center (ARCS) · Northridge, CA

SEP 2026 – PRESENT

Multi-institution simulation platform built with NASA JPL and Armstrong Flight Research Center.

- Contribute to platform architecture, security planning, and the software requirements specification
- Help plan access control, API key management, and an architecture ready for future AI-agent integration

- Research AI agent frameworks and how autonomous agents could operate safely within the platform
- Present progress weekly and collaborate across institutions through design reviews

Information Technology Staff

KSR Dance & Silambam Studio · Chennai, India

MAR 2022 – MAY 2023

Sole IT resource for 15 months with no supervisor.

- Imaged, configured, and troubleshot systems and the network, delivering full uptime and zero data loss
- Owned account provisioning, access control, and least-privilege permissions across all systems
- Documented every configuration and fix so procedures were repeatable and consistent

Technical Support Help Desk

SP Hema Academy · Chennai, India

APR 2021 – FEB 2022

- Delivered Tier 1 / Tier 2 support across Windows and SaaS environments for users of all technical levels
- Built a knowledge base of recurring issues so fixes were faster and more consistent

Game Management Event Staff

California State University, Northridge · Los Angeles, CA

NOV 2023 – DEC 2024

- Supported 20+ large-scale campus events, coordinating across logistics, athletics, and administration teams

Projects

NetScope — CLI Network Traffic Analyzer

Python · tshark · JavaScript · Chart.js

A Python command-line tool for Linux that captures and parses raw packet data with tshark, handles messy real-world input, and automatically generates readable Chart.js reports.

View on GitHub →

Kaasu Creator — Full-Stack Web App

Java · Spring Boot · Docker · JavaScript

A full-stack web application designed and built independently, containerized with Docker and managed with Git, debugged across both backend and front end.

View on GitHub →

TCP Port Scanner

Python · Socket Programming · Threading

A multithreaded scanner that uses raw sockets to probe hosts concurrently and report open ports, handling timeouts and unreachable hosts cleanly.

View on GitHub →

Password Strength Checker

Python · Regex · Shannon Entropy · OWASP

Scores passwords using regex pattern checks and Shannon entropy, aligned with OWASP guidance, to flag weak credentials.

Skills

LANGUAGES & DEVELOPMENT

Python | Java | JavaScript | SQL | Bash | REST APIs | Git / GitHub | Spring Boot

SYSTEMS & CLOUD

Linux | Windows | macOS | Docker | TCP/IP | DNS / DHCP | Google Cloud Security

SECURITY & AI

Access Control | Secure Coding (OWASP) | Vulnerability Management (Qualys) | NIST CSF | Claude & Claude Code | Model Context Protocol

Education

California State University, Northridge

Bachelor of Science, Computer Science

AUG 2023 – MAY 2027 (EXPECTED)

Coursework: Operating Systems, Data Structures & Algorithms, Computer Networks, Database Systems, Computer Security, Discrete Mathematics, Web Engineering.

Certifications

- **CompTIA Security+** — CompTIA, June 2026
- Google Cybersecurity Professional Certificate — Google
- Model Context Protocol: Advanced Topics — Anthropic
- Introduction to Model Context Protocol — Anthropic
- AI Fluency: Framework & Foundations — Anthropic
- Qualys Vulnerability Management Foundation — Qualys
- Trust and Security with Google Cloud — Simplilearn
- Cisco Networking Academy — Cisco
- Cybersecurity Analyst Job Simulation — Forage
- Cyber Security Operations Job Simulation — Forage
